TAMPER-PROOF KEY RINGS

Every ring comes engraved with its own, unique serial number for identification purposes. This string of letter and numbers served as a tracking device for conducting audits on both the rings and their keys. This ID prevents somebody from removing or substituting keys without detection.

*Smooth Flush Seal
Unmatched Flexibility
Manufactured with the strictest tolerances to provide you with the ultimate in strength and durability*

Our Tamper-Proof Key Rings, made of solid and braided stainless steel, have male and female ends. You close the one inside the other and use a crimping tool to squeeze and tighten the connection.

* Tools are required for closing, crimping and cutting the key rings. Please request pricing.

Tamper-Proof Key Rings

Diameter	Part Number
1"	KR-279
1 5/8"	KR-278
2"	KR-270
